Institutional Report

This letter confirms that Olga Bychkova taught two courses – Introduction to Corporate Finance and Macro Topics: Introduction to Matlab at the Faculty of Mechanics and Mathematics of Ivan Franko National University of Lviv, Ukraine.

I would like to inform you that we were glad to host Olga Bychkova. During the classes, she was extremely responsible and perfect organized. She provided interesting and powerful lectures and workshops in excellent way.

Teaching Fellowship Program provides unique opportunity for our students as well as for our teachers to learn a wide range of modern approaches and interesting topics in Econometrics, Finance, Micro and Macroeconomics. Fellows demonstrate connection between fields and provide many practical examples that undoubtedly are valuable for our students and make great contribution in their education.

Fellows help our students to develop new skills and get knowledge that they wouldn't be able to get without the Teaching Fellowship Program.

The Department of Mathematical Economics and Econometrics of the Faculty of Mechanics and Mathematics gratefully acknowledges her contribution in developing economic courses and especially for teaching and providing online classes during this difficult time of Covid-19 quarantine.

27.05.2020

Marianna Oliskevych,

Professor at Department of
Mathematical Economics and Econometrics,
Ivan Franko National University of Lviv
